

In-bail Identification Rotary

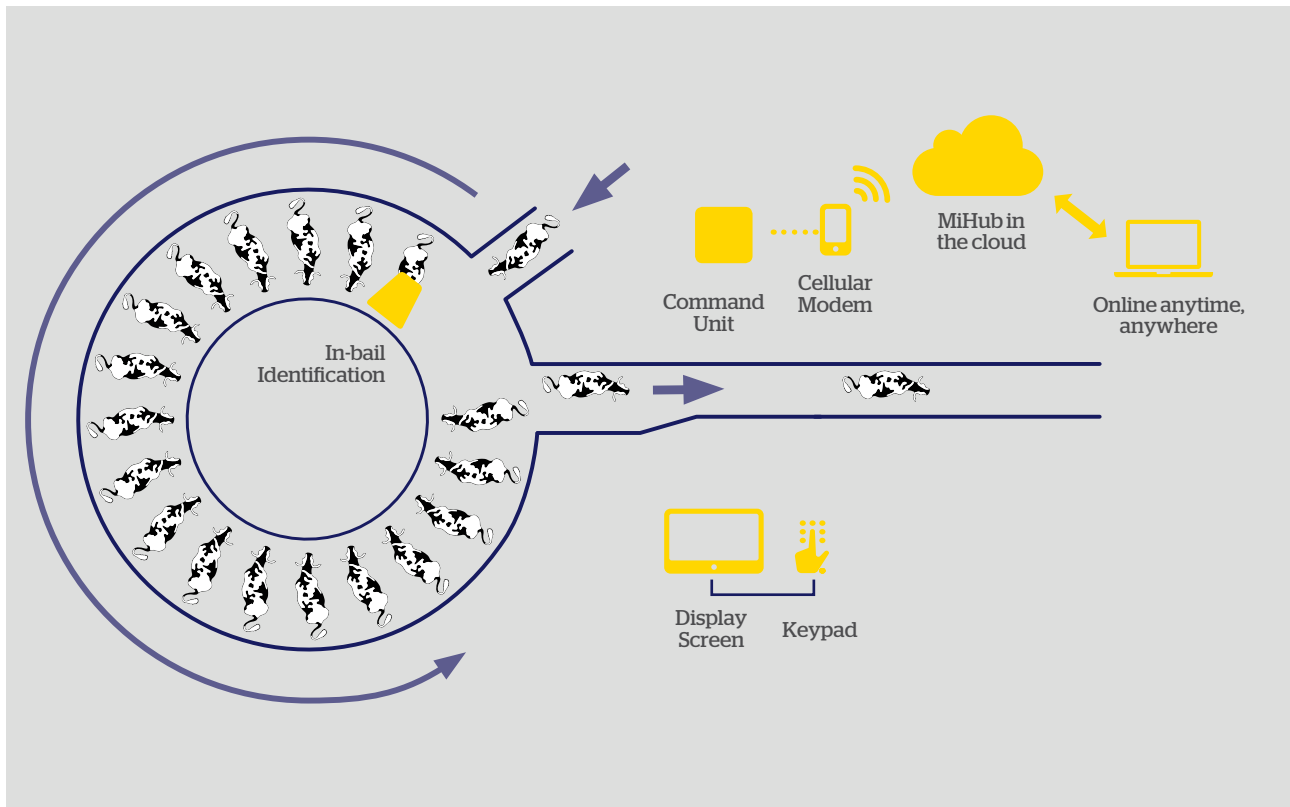

In-bail identification enables you to see individual cow information in-shed in real time, so that you can action on-the-spot animal management decisions. The in-shed keypad also enables you to create new alerts and make notes while in the shed.

In-bail Identification for Rotary comes with MiHub Online Herd Management, which allows you to access your animal information online at any time from any computer, for ongoing herd management and decision making support.

Features and benefits

- ✓ In-shed display and keypad allows you to immediately access individual cow information and to:
 - View, manage and set alerts such as mastitis, lameness, 3 titters etc
 - View herd group information
 - View, manage and record treatments and be alerted to withholds
 - View, manage and record heat detection and AB events
 - View, manage and record pregnancy test data
- ✓ In-bail Electronic Identification Panel Reader allows you to accurately record cow numbers, herd groups and any missing cows
- ✓ MiHub Online Herd Management Tool allows you to build herd history for ongoing herd management and decision making support.

**Module includes:**

- Tru-Test In-bail Electronic Identification Panel Reader and Antenna
- In-shed display and keypad
- Command Unit, which connects in-shed actions with MiHub Online Herd Management tool.
